Not Shown:

Two large tents in the south parking lot behind the EOC. These were used as barracks for some of the National Guard Troops and for Emergency Management Teams that came in from outside Lee County to help with the recovery. There was also a fuel truck which dispensed gasoline into vehicles as needed.

There were about 150 people in the EOC SitRoom at any given time, including overnight.

Emergency Management Teams came from several counties and served to relieve our own EM Staff starting the day after the Storm. Four days in, this allowed our EM crew to go home and unwind from their 12 (and sometimes 24 hour) days.

Kudos to Lee County Emergency Management Staff for a great job during and after IAN.

THANKS to all the Responders who came to Lee County to help with the recovery. There were Search and Rescue Teams; Communications Teams (who helped augment the Public Safety Comm systems, especially on Sanibel, Pine Island and Fort Myers Beach); Utility Crews (Electrical, Telephone, Cell Providers); Fire and Ambulance Crews (with vehicles); National Guard Teams (who helped with Security and Traffic Control -- among other things); Law Enforcement Officers from various agencies around the State; FEMA Representatives and teams from some State Agencies who came here and helped with the initial response / recovery operations.

Photo from outside a Publix Store the week after IAN... ..which speaks to the full impact of the Storm.
